

# ELECTRICAL POWER & LIGHTING DESIGN

*By: Eng. Mohammed Ayman*

*Comprehensive  
Guide to  
Distribution of  
Power and  
Lighting Using  
AutoCAD,  
DIALux & Excel*

**About the Author**

***Eng. Mohammed Ayman***

*I earned my degree from Eastern Mediterranean University (Turkey, North Cyprus) in B.S Electrical & Electronic Engineering; shortly after, I began my career as an electrical site engineer in a mega-scale project in Qatar which allowed me to monitor and supervise electrical site installations. Following that, I indulged in the design field of the electrical low voltage distribution systems and have accomplished more than 10 projects with the compliance of the national codes & international standards.*

- *Holding ABET Accreditation.*
- *Registered and accredited by the Engineering & Consulting Committee in Qatar.*
- *Accredited by Engineers Australia as a Professional Engineer.*

**Electrical Power & Lighting Design Coursebook**

**By: Eng. Mohammed Ayman**

**Course Outline**

|   |           |
|---|-----------|
| <b>Introduction 1</b> .....                             | <b>8</b>  |
| 1.1. Introduction to the Course Content .....           | <b>8</b>  |
| <b>2. Introduction to AutoCAD</b> .....                 | <b>11</b> |
| 2.1. Introducing AutoCAD Commands in Toolbars .....     | <b>12</b> |
| 2.1.1. Drawing Template .....                           | <b>13</b> |
| 2.1.2. Draw Toolbar .....                               | <b>14</b> |
| 2.1.3. Modify Toolbar .....                             | <b>15</b> |
| 2.1.4. Annotation Toolbar .....                         | <b>15</b> |
| 2.1.5. Layers Toolbar .....                             | <b>15</b> |
| 2.1.6. Block Toolbar .....                              | <b>15</b> |
| 2.1.7. Properties Toolbar .....                         | <b>15</b> |
| 2.2. Drawing Shapes and Objects .....                   | <b>16</b> |
| 2.2.1. Drawing Lines .....                              | <b>16</b> |
| 2.2.2. Drawing Polylines .....                          | <b>17</b> |
| 2.2.3. Drawing Circles .....                            | <b>18</b> |
| 2.2.4. Drawing Arcs .....                               | <b>18</b> |
| 2.2.5. Drawing Rectangles .....                         | <b>19</b> |
| 2.2.6. Hatching Objects .....                           | <b>20</b> |
| 2.2.7. Different Electrical Objects .....               | <b>21</b> |
| 2.3. Modify Toolbar .....                               | <b>21</b> |
| 2.3.1. Moving, Rotating, and Copying .....              | <b>22</b> |
| 2.3.2. Mirroring .....                                  | <b>23</b> |
| 2.3.3. Trimming .....                                   | <b>23</b> |
| 2.3.4. Fillet .....                                     | <b>23</b> |
| 2.3.5. Stretching and Scaling .....                     | <b>24</b> |
| 2.4. Blocks .....                                       | <b>24</b> |
| 2.4.1. Converting Different shapes into Blocks .....    | <b>25</b> |
| 2.4.2. Advantage of Converting Shapes into Blocks ..... | <b>25</b> |
| 2.5. Status Toolbar .....                               | <b>26</b> |

|           |   |           |
|-----------|---|-----------|
| 2.5.1.    | Object Snap .....   | 26        |
| 2.5.2.    | Orthomode .....   | 27        |
| 2.5.3.    | Polar Tracking .....  | 28        |
| 2.5.4.    | Starting of an Electrical Project .....                     | 29        |
| 2.6.      | End of Chapter Quiz .....                                   | 30        |
| <b>3.</b> | <b>DIALux Evo .....</b>                                     | <b>32</b> |
| 3.1.      | Introduction to DIALux Evo Version .....                    | 32        |
| 3.2.      | Introducing DIALux Menu Toolbar Features .....              | 33        |
| 3.2.1.    | Starting a Project .....                                    | 33        |
| 3.2.2.    | Menu Toolbar .....  | 34        |
| 3.2.3.    | Construction Toolbar .....                                  | 35        |
| 3.2.4.    | Light Toolbar .....   | 36        |
| 3.2.5.    | Calculation Objects .....                                   | 37        |
| 3.2.6.    | Manufacturer Toolbar .....                                  | 38        |
| 3.2.7.    | 3D & Other Views .....                                      | 38        |
| 3.2.8.    | Documentation .....   | 39        |
| 3.3.      | Importing Architectural Plan from AutoCAD into DIALux ..... | 40        |
| 3.3.1.    | Preparation of Architectural Layout .....                   | 41        |
| 3.3.2.    | Converting AutoCAD Format into DIALux .....                 | 42        |
| 3.3.3.    | Importing Plan into DIALux .....                            | 43        |
| 3.4.      | Preparation of Rooms Using Construction Toolbar .....       | 43        |
| 3.4.1.    | Drawing Room Plans .....                                    | 44        |
| 3.4.2.    | Drawing Room Elements & Apertures .....                     | 45        |
| 3.4.3.    | Average Lux Input .....                                     | 46        |
| 3.4.4.    | Uniformity Level .....                                      | 47        |
| 3.4.5.    | False Ceiling .....   | 48        |
| 3.5.      | False Ceiling Types & Light Fixtures Selection .....        | 49        |
| 3.5.1.    | Types of Ceilings .....                                     | 49        |
| 3.5.2.    | Types of Light Fixtures .....                               | 50        |
| 3.5.3.    | IP Ratings of Light Fixtures .....                          | 52        |
| 3.6.      | Calculation of Lux Levels & Results .....                   | 53        |
| 3.7.      | Documentation & Exporting to AutoCAD .....                  | 54        |
| 3.7.1.    | Lux Result Report Preparation .....                         | 54        |
| 3.7.2.    | Exporting DIALUX into AutoCAD Format .....                  | 55        |
| 3.7.3.    | Pasting Exported Light Fixtures to AutoCAD .....            | 56        |

|           |   |           |
|-----------|---|-----------|
| 3.8.      | End of Chapter Quiz .....   | 57        |
| <b>4.</b> | <b>Lighting Distribution .....</b>                                  | <b>59</b> |
| 4.1.      | Folders Management and Arrangement .....                            | 59        |
| 4.1.1.    | Electrical Systems Folders Arrangement .....                        | 59        |
| 4.2.      | Normal Light Distribution .....                                     | 60        |
| 4.2.1.    | Light Symbols Legend .....  | 61        |
| 4.2.2.    | Distribution of Lights Inside Rooms .....                           | 62        |
| 4.3.      | Emergency Light Distribution .....                                  | 64        |
| 4.3.1.    | Types of Loads .....  | 64        |
| 4.3.2.    | Distribution of Emergency Lights .....                              | 66        |
| 4.3.3.    | Exit Lights & Slave Luminaires .....                                | 67        |
| 4.3.4.    | Central Battery System .....  | 69        |
| 4.4.      | Light Switches .....  | 70        |
| 4.4.1.    | Types of Light Switches .....                                       | 71        |
| 4.4.2.    | Distribution of Light Switches .....                                | 73        |
| 4.5.      | Connection of Lighting Wiring Circuits .....                        | 75        |
| 4.5.1.    | Drawing Wiring Lines .....  | 75        |
| 4.5.2.    | Connecting Lights to Switches .....                                 | 77        |
| 4.6.      | Preparation of Lighting Legends .....                               | 79        |
| 4.7.      | End of Chapter Quiz .....   | 80        |
| <b>5.</b> | <b>Power Distribution .....</b>                                     | <b>82</b> |
| 5.1.      | Gathering Information & Preparation of Power Plan .....             | 82        |
| 5.1.1.    | Gathering Electrical Information from Architecture Department ..... | 82        |
| 5.1.2.    | Gathering Electrical Information from Mechanical Department .....   | 83        |
| 5.1.3.    | Locking AutoCAD Layers Power Plan .....                             | 84        |
| 5.2.      | Distribution of Wall Sockets & Floor Boxes .....                    | 85        |
| 5.2.1.    | Furniture & Power Sockets .....                                     | 86        |
| 5.2.2.    | Floor boxes .....   | 87        |
| 5.2.3.    | Wall Sockets .....  | 88        |

|           |  |            |
|-----------|--|------------|
| 5.3.      | Power Provisions for Mechanical Equipment .....        | 90         |
| 5.3.1.    | Power for Air Conditioners .....                       | 90         |
| 5.3.2.    | Power for Water Heaters & Fans .....                   | 92         |
| 5.4.      | Types of Electrical Circuits .....                     | 93         |
| 5.4.1.    | Ring Main Circuits .....                               | 94         |
| 5.4.2.    | Radial Circuits .....                                  | 95         |
| 5.5.      | Circuit Numbers of Loads .....                         | 96         |
| 5.5.1.    | Sockets Circuit Numbers .....                          | 96         |
| 5.5.2.    | Locating Distribution Boards .....                     | 97         |
| 5.6.      | Roof Power Provisions .....                            | 98         |
| 5.6.1.    | Isolators .....  | 99         |
| 5.6.2.    | Weatherproof Sockets .....                             | 100        |
| 5.7.      | Electrical Rooms & Panel Boards .....                  | 101        |
| 5.7.1.    | Distribution of Panel Boards .....                     | 102        |
| 5.7.2.    | Selection of Electrical Rooms .....                    | 103        |
| 5.8.      | End of Chapter Quiz .....                              | 106        |
| <b>6.</b> | <b>DB Schedules &amp; Single Line Diagrams .....</b>   | <b>108</b> |
| 6.1.      | Creating a DB Schedule Using Excel Sheet .....         | 108        |
| 6.1.1.    | Exploring Excel Preferences .....                      | 108        |
| 6.1.2.    | Defining DB Attributes .....                           | 109        |
| 6.2.      | Defining Schedule Equations in Excel .....             | 111        |
| 6.2.1.    | Circuit Number Ways .....                              | 111        |
| 6.2.2.    | R Y B Phases .....                                     | 112        |
| 6.2.3.    | Demand Factor .....                                    | 113        |
| 6.2.4.    | Total Demand Load .....                                | 114        |
| 6.2.5.    | Total Connected Load .....                             | 115        |
| 6.2.6.    | Balancing Loads Equation .....                         | 116        |
| 6.3.      | Defining DB Schedule Loads in Excel .....              | 117        |
| 6.3.1.    | Filling DB Schedule Headline .....                     | 117        |
| 6.3.2.    | Defining & Matching Loads with CAD Drawings .....      | 118        |
| 6.4.      | Transferring a DB Schedule from Excel to AutoCAD ..... | 119        |
| 6.4.1.    | First Method .....                                     | 120        |

|           |  |            |
|-----------|--|------------|
| 6.4.2.    | Second Method .....  | 120        |
| 6.5.      | Single Line Diagrams .....   | 121        |
| 6.5.1.    | HV to LV Generation, Transmission & Distribution of Power .....                      | 121        |
| 6.5.2.    | Interpreting a Single Line Diagram .....   | 122        |
| 6.5.3.    | Interpreting a Single Line Diagram with a Backup Generator .....                     | 124        |
| 6.5.4.    | Design a Single Line Diagram in AutoCAD .....  | 125        |
| 6.6.      | End of Chapter Quiz .....  | 127        |
| <b>7.</b> | <b>Low Voltage Design Calculations .....</b>   | <b>128</b> |
| 7.1.      | Low Voltage Transformers .....   | 128        |
| 7.1.1.    | Types of LV Transformers .....   | 128        |
| 7.1.2.    | Types of Transformers Connections .....  | 130        |
| 7.1.3.    | Transformer Size Calculation .....   | 131        |
| 7.2.      | Backup Generators .....  | 134        |
| 7.2.1.    | Diesel Backup Generators .....   | 135        |
| 7.2.2.    | Portable Generators .....  | 136        |
| 7.2.3.    | Generator Size Calculation .....   | 137        |
| 7.3.      | Cables and Wires .....   | 140        |
| 7.3.1.    | Selection of Cables and Wire Types .....   | 140        |
| 7.3.2.    | Cable Size Calculation .....   | 143        |
| 7.4.      | Circuit Breakers .....   | 145        |
| 7.4.1.    | Types of Circuit Breakers .....  | 146        |
| 7.4.2.    | Circuit Breaker Size Calculation .....   | 151        |
| 7.5.      | Voltage Drop .....   | 153        |
| 7.5.1.    | Voltage Drop Causes, Effects & Mitigation .....                                      | 154        |
| 7.5.2.    | Permitted Voltage Drop Percentage .....  | 155        |
| 7.5.3.    | Voltage Drop Calculation .....   | 156        |
| 7.6.      | Short Circuit Current (SCC) .....  | 160        |
| 7.6.1.    | Types, Causes & Effects of Short Circuit Faults .....                                | 161        |
| 7.6.2.    | Short Circuit Analysis & Calculation .....   | 163        |
| 7.7.      | Calculating Voltage Drop & Short Circuit Current in Excel Sheets (Lecture Videos)167 |            |
| 7.8.      | Power Factor Correction .....  | 167        |

|   |            |
|---|------------|
| 7.8.1. Types of Power .....                               | 168        |
| 7.8.2. Types of Loads .....                               | 169        |
| 7.8.3. Resistive, Inductive & Capacitive Loads .....      | 170        |
| 7.8.4. Capacitor Bank Size Calculation .....              | 172        |
| <br>  |            |
| 7.9. End of Chapter Quiz .....                            | 175        |
| <br>  |            |
| <b>8. Earthing &amp; Lightning Systems .....</b>          | <b>177</b> |
| <br>  |            |
| 8.1. Earthing System .....                                | 178        |
| 8.1.1. Types of Earthing Systems .....                    | 181        |
| 8.1.2. Earthing System Calculation .....                  | 184        |
| 8.1.3. Components of Earthing System .....                | 189        |
| <br>  |            |
| 8.2. Lightning Protection System .....                    | 190        |
| 8.2.1. Components of LPS .....                            | 191        |
| 8.2.2. Types of LPS .....                                 | 192        |
| <br>  |            |
| 8.3. Lightning Risk Assessment .....                      | 196        |
| 8.3.1. Lightning Protection Levels (LPL) .....            | 200        |
| 8.3.2. Lightning Design Considerations .....              | 203        |
